This study was conducted to examine the satisfaction level of the pioneer graduates of senior high school who took GAS strand offered by GEANHS-Bailen in the school year 2017-2018. It will focus on satisfaction of the graduates particularly in the subject experience and teaching style. This paper wants to recommend some ways to improve the teaching style and other area in GAS implementation based on students' view. A total of 48 pioneer graduates participated in this study.

Descriptive method of quantitative research was used in this study to deeply analyze and describe the situation, experiences and satisfaction of pioneer graduates of Senior High School who took GAS strand at GEANHS-Bailen. The major tool used in data gathering was researchers made questionnaire which was divided into 2 parts.

The statistical treatments used after data had been gathered are frequency and percentage distribution, weighted mean, pearson correlation and t-test.

From the data gathered, it was revealed that pioneer graduates of Senior High School (SHS) were very satisfied on the teaching and subject experience in GAS strand. The findings of the study confirmed that there is no significant difference between the level of satisfaction in GAS strand subjects and teaching style when grouped according to gender. The researchers also made use of related sources from studies to support the results.
